

Taco Bell | Across the Southeastern U.S.

Proficient is consistently helping Taco Bell expand and has worked on several of their locations across the Southeast.

Ted's Montana Grill | Across the U.S.

Ted's is a proud tribute to the ingredients, meals and hospitality that define the Great American West. Proficient Engineering is helping improve prototypical design to help the growth of this national account.

Zaxby's | Across the Southeastern U.S.

Proficient developed the new prototype design for Zaxby's. This prototype has saved thousands of dollars on each store while providing more comfortable space conditions using less energy.

Waffle House | Across the U.S.

Proficient consistently is helping Waffle House expand by engineering their more complicated fit-ups in existing facilities.

Twin Peaks | Across the U.S.

Twin Peaks is the ultimate sports lodge that offers everything you crave and more. Proficient has improved the design with each new project and continues to help twin peaks expand across the U.S.

Burger King | Across the U.S.

Proficient created a prototype for Burger King and has worked on several of their locations across the United States.

Mizu Restaurant | Charlotte, NC

Located on the 9th floor of the Hyatt Centric 10-story hotel, Mizu Restaurant consists of 6,960 square feet and will be full service with a dining room, a bar, restrooms, a kitchen, and a 1,525-square-foot, exterior dining terrace.

C Ellet's | Marietta, GA

C. Ellet's is a next-generation steakhouse located at The Battery at SunTrust Park. The space includes a kitchen, associated storage spaces, a bar, oyster bar with walk up service window, multiple points of sale and dining spaces, and restrooms required for the fit-out.

Boneheads | Across the Southeastern U.S.

Bonehead's is a small chain in the Southeast US. This 3,200 square foot restaurant is mainly known for their chicken, fish dishes and healthy sides.

Dreamland BBQ | Duluth, GA

Dreamland is known for their bar-b-que ribs and southern atmosphere. The décor inside is warm and inviting with a big bar, a few tables and booths and a pot bellied stove. Duluth Georgia is home to this 6,500 square foot BBQ restaurant.

Bar Mercado | Atlanta, GA

For Bar Mercado, bright colors and bold patterns are layered over an existing backdrop of old brick, steel, and concrete to evoke the excitement of a Spanish market. Alongside our restaurant clients, we took inspiration from the Mercado de San Miguel, a food hall within an open ironwork structure dating from 1916 located in Madrid.

KFC | Across the U.S.

Proficient designed a prototype for KFC and has worked on several of their locations across the United States.

Smoothie King | Across the Southeastern U.S.

Proficient has partnered with Smoothie King to complete multiple projects across the Southeast.

Gusto at The Avalon | Alpharetta, GA

Gusto is known for their unique menu and innovative attitude. This restaurant makes a great addition to the Avalon, a popular hangout spot outside of Atlanta.

Dunkin' Donuts | Across the U.S.

Proficient developed a prototype for Dunkin' Donuts and has completed multiple designs for the popular donut shop across the Southeast.

Chick-Fil-A | Across the U.S.

Proficient has completed several designs for the famous fast-food chain across the country.

Kale Me Crazy | Across the Southeastern U.S.

Kale Me Crazy is a super food café that focuses on feeding a healthy lifestyle. Proficient has designed several of these establishments across the Southeast.

Popeyes | Across the Southeastern U.S.

Popeyes is known for their southern style chicken and southern atmosphere. Proficient has designed several of the food chain's locations across the Southeast.

Jersey Mike's | Across the U.S.

Jersey Mike's is one of the most well known sandwich shops across the United States. Proficient has designed several of their locations.

Jeni's Ice Cream | Across the Southeastern U.S.

Jeni's is a great place to cure a sugar craving. Proficient has designed multiple locations of these popular gourmet ice cream shops.

Donetto | Atlanta, GA

Donetto features a polished and contemporary restaurant with subtle hints of the establishment's Italian roots. The roughly 12,000-square-foot space is complete with industrial windows, a kitchen-facing pasta bar and a wood-fired grill.

O-Ku | Charlotte, NC & Atlanta, GA

O-Ku restaurant celebrates authentic Asian cuisine with a southern approach and a menu that focuses on unique ingredients and sophisticated presentations. Both locations are roughly 7,500 square feet with a full kitchen and bar and required wood solid fuel.

Farm to Ladle | Alpharetta, GA

Farm to Ladle is part of the Avalon mixed-use development just north of Atlanta. The establishment features an urban farmhouse spin theme with an eclectic mix of food. The design of the nearly 2000-square-foot cafe elevates traditional building materials often neglected in construction, like pallets, joists, can lights, and concrete.

Mary Hoopa's House of Fried Chicken & Oysters | East Lake, GA

Mary Hoopa's consists of bright and open dining room that seats up to 54 people with an oyster bar in the front of the restaurant and another bar towards the back entrance. A back deck seats an additional 32 people and will be open during the warmer months.

Oak Steak House | Charlotte, NC

Oak Steakhouse is a modern take on the classic American steakhouse. The square footage of the restaurant is just under 14,000 square feet with a full kitchen and bar. This project required wood burning solid fuel.

Bojangles | Multiple Cities

Proficient has completed Bojangles prototypes in several cities, including in the North Carolina cities of Gastonia, Woodfin, Leland, Charlotte, and Jamestown as well as Greenville, SC.

Big Kahuna Wings Addition | Knoxville, TN

Currently in permitting, the Big Kahuna Wings addition required mechanical and electrical construction documents for a 6'x15' addition to one side and a 14'x24' addition on the other.

La Furtuna | Charleston, SC

Located at 88-90 Broad Street in Charleston, SC, the project involves an approximately 10,000-square foot fit up for a La Furtuna restaurant. The restaurant consists of 3 floors and a cellar along with a wine room, alimentari, atrium, kitchen, and bar.

Azul Cantina | Pigeon Forge, TN

Located at the Mountain Mile shopping and entertainment complex, the project involves a 9,000-square-foot fit-up of an existing space for a Mexican restaurant. The venue features classic Mexican cuisine, a brewery and Pigeon Forge's first rooftop bar.

Frothy Monkey | Knoxville, TN

The Frothy Monkey project features a 4,500-SF restaurant fit-up in the historic Kress building. The space includes a 700-SF mezzanine with dining seating. The restaurant will seat 150+ occupants with an indoor and outdoor patio along Gay Street.

H&W Steakhouse | Peachtree Corners, GA

H&W Steakhouse is a brand of parent company Norsan Restaurants. This concept will breathe new life into the traditional steakhouse and plans to carry the finest prime grade, black angus and corn fed steaks. The scope of the project includes a 6,600-square-foot building with covered patio. The dining room and bar was gutted and the kitchen was reworked.

Wild Wing Cafe | Dawsonville, GA

An existing Ruby Tuesday is being converted into a Wild Wing Café in Dawsonville, GA. The project scope includes a new covered patio to front of building, an expanded bar area, a new kitchen equipment layout, a potential new raised stage in dining room, and a potential addition of a new cooler to back of building.

Zalate Taqueria | Knoxville, TN

The project featured the mechanical, electrical, and plumbing engineering design for a 3,800-square-foot restaurant renovation of an existing retail space with a bar.

Bud's Farmhouse Coffee | Oak Ridge, TN

For Bud's Farmhouse Coffee, we provided the mechanical, electrical, and plumbing engineering design for an approximately 1,500-square-foot coffee shop fit-up of a previously occupied generic retail space. The mechanical scope included reusing existing RTU with the revised diffuser layout. One new restroom was also added and the existing restroom was modified as necessary to meet code.

Common Place Coffee | Knoxville, TN

The project involved an approximately 2,700-square-foot coffee shop tenant fit-up. The HVAC scope included re-using the existing system if possible. New exhaust fan(s) were included for the revised bathroom layout. The plumbing scope covered the modification of the bathroom layout and the addition of a coffee bar with a dishwasher and under-counter grease trap. Lighting updates and power design was also included as needed.

854 N Central Street | Knoxville, TN

Located along 854 N Central Street, the 2,400-square-foot space featured a renovation for a restaurant shell. The scope included a new HVAC system serving the main space and restrooms, spiral ductwork in the main space, rough-in plumbing for the hot water heater and connection to utilities, a grease interceptor on site for a future kitchen, and minimal lighting for the shell.

Craven Wings | Knoxville, TN

The Craven Wings project featured an approximately 2,850-SF, 90-seat restaurant fit-out of an existing, 2-story, cold dark shell building. The restaurant occupies 2 of the 4 tenant spaces included in the existing shell. Gas was provided for the kitchen and HVAC equipment.
